### What can students expect?
The student will be exposed to some of the following learning areas:

- Discussing the various issues to consider when designing, planning or operating a supply chain
- Describing how to create a strategic fit between a competitive strategy and a supply chain strategy
- Understanding the impact that creating a strategic fit between an organisation’s competitive strategy and a supply chain strategy will have on competitiveness
- Explaining the importance of expanding the scope of strategic fit from one operation within a company to all stages of the supply chain
- Defining the logistical and cross functional drivers of a supply chain
- Describing how the drivers of a supply chain are used in design, planning and operation of the supply chain
- Identifying the key metrics that track the performance of the supply chain in terms of each driver
- Understanding the role that forecasting plays in the supply chain

### Admission requirements
You should have intermediate knowledge and/or experience of Supply Chain Management to be able to cope with the advanced programme.
