Further Education and Training (FET) Programmes

"...the aim of providing learners with the **conceptual framework** and the **skills necessary**..."

Learnerships

NQF Level 3

National Certificate: Freight Forwarding and Customs Compliance

SAQA ID: 59365

Accredited by: Transport Education and Training Authority (TETA)

About the programme: This programme is developed with the aim of providing learners with the conceptual framework and the skills necessary to perform routine functions within the freight forwarding and customs compliance environment. It is intended to equip learners to be able to operate cross-functionally within the freight forwarding and customs compliance environment of the international logistics industry.

What can learners expect?

This programme aims to provide learners in the road transport sector with the following skills required in this industry:

- Outlining the legal environment of a selected industry
- Complying with organisation ethics
- Applying geographic principles in mapping a trade route
- Interpreting and applying International commercial terms
- Identifying equipment and infrastructure used in international transport
- Describing and applying the Customs and Excise Act
- Outlining the structure of the airfreight forwarding environment
- Outlining the structure of the surface freight forwarding environment

What can learners expect?

Some elective specialisation areas to choose from include:

- Customs
- Airfreight
- Surface Freight

Admission requirements

Prospective learners must be competent in:

- Mathematical Literacy and Communication at NQF Level 2.

Duration

Approximately 12 months of structured practical and theoretical training, leading to a full qualification.

Mode of delivery

This programme is delivered through contact sessions that will provide the learner with the interpersonal support for learning to take place. Furthermore, a workplace component will allow the learner to apply knowledge gained in a workplace environment.
