

Set your own goals and go the distance with OLG Short Learning Programmes.

**NOF
Level 5**

Fundamental Supply Chain Management (NOF Level 5)

This SLP enables students to reflect on personal and/or group competencies and outputs by using acquired, highly-specialised, intellectual knowledge of supply chain management.

This programme would suit an individual who needs to develop his/her competence in order to analyse how businesses can improve their competitive positions by employing the most effective supply chain practices.

What can students expect?

The student will be exposed to some the following learning areas:

- Identify the major drivers of supply chain performance
- Identify the key factors to be considered when designing a distribution network
- Understand how e-business has affected the design and distribution networks in different industries
- Identify the factors influencing supply chain network design decisions
- Develop a framework for making network design decisions
- Use optimisation for facility location and capacity allocation decisions
- Identify the components of a demand forecast
- Forecast demand in a supply chain, given historical demand data and using times series methodologies

Duration and mode of delivery

This programme is delivered through:

- Contact sessions that include training from industry experts and practical on-the-job advice.
- OR**
- A blended mode, offering limited contact classes combined with open distance learning.
